

FIBER ARMCHAIR – TUBE BASE

ISKOS-BERLIN ON THE DESIGN “One of the most difficult and noble disciplines is to design without eccentricity, creating simple, well-functioning and almost ordinary objects that nevertheless have strong identities. We designed Fiber Armchair to do just that through a clear sculptural language that refuses to compromise on comfort. It’s a chair stripped of all unnecessary layers. The iconic form marries soft, embracing curves with an innovative wood fiber composite, giving Fiber Armchair a unique expression and tactile texture.”

DESCRIPTION

The Fiber Armchair is made from an innovative wood fiber composite with up to 25% wood fibers for a tactile expression and matte touch, joined by the Scandinavian touch of a tube base. The fibers make for a unique texture when viewed up-close yet become invisible to the eye when viewed from afar, paired with an embracing yet minimal shape.

PRODUCTION PROCESS

The wood and plastic composition is heated and poured into a mold that presses the chair’s shell. The wood base is cut from solid oak wood, polished and powder lacquered for the coloured chairs.

MATERIAL

Shell consists of a wood and plastic composition with up to 25% wood fibers, 70% PP (poly-
