

# FIBER SIDE CHAIR SWIVEL BASE & SWIVEL BASE W. CASTORS

ISKOS BERLIN ON THE DESIGN “One of the most difficult and noble disciplines is to design without eccentricity, creating simple, well-functioning and almost ordinary objects that nevertheless have strong identities. We designed Fiber Side Chair to do just that through a clear sculptural language that refuses to compromise on comfort. It’s a chair stripped of all unnecessary layers. The iconic form marries soft, embracing curves with an innovative wood fiber composite, giving Fiber Side Chair a unique expression and tactile texture.”

## DESCRIPTION

The Fiber Side Chair is made from an innovative wood fiber composite with up to 25% wood fibers for a tactile expression and matte touch, joined by the Scandinavian touch of a swivel base. The fibers make for a unique texture when viewed up-close yet become invisible to the eye when viewed from afar, paired with an embracing yet minimal shape.

## PRODUCTION PROCESS

The wood fiber and plastic blend is injected into the mold, forming the chair’s shell. The steel sled base is CNC-bent and powder coated.

## MATERIAL

The shell consists of a PP composition with up to 25% wood fibers and colored Polypropylene. The swivel base is die casted aluminum. Remix textile from Kvadrat or Silk leather from Camo Leathers.
