MUUTO

“The Couple Coffee Table was born out of my research into this traditional and essential piece of furniture. I wanted to come up with a new yet subtle take on its materials and typology. I was inspired by the materiality of fired earth like brick and terracotta, finding that a beautiful synergy occurs when it is combined with wood.”

— Sylvain Willenz on the design

“I have always been drawn to texture and wanted the design to have an inherently tactile character, produced by the grainy feel of the ceramic tile’s surface. The design allows you to choose between and combine tiles with a smooth surface or with a soft wavy look. Thanks to these materials, their finishes, and fine design details, Couple Coffee Table subtly merges a familiar piece of furniture with forward-thinking features.”

Textured tangents

Inspired by the traditional tile table, the Couple Coffee Table is a refined merging of materials; FSC™-certified wood and stone. Made in a tactile ceramic stone material — a hard and dense clay type similar to Bone China in terms of durability and strength — it is a reference to the continued aesthetic relevance and strength of the brick.

This sense of tactility is enhanced by the option of two different table top tiles; one with a plain and functional surface, the other with a more sculptural wavy feel.

The Couple Coffee Table is available in three sizes, from the petite one-tile to the grand coffee table with plenty of room for books and objects of affection.
